Huglu 20 cal. Exchanges with Huglu. Note: The first 200 or so of these guns that were imported into the United States take Beretta/Benelli Mobil not Huglu.

ITHACA INFORMATION

Ithaca used three different strangulation models. The first design used in all Ithaca shotguns was the Tru-choke in both the 12 and 20 caliber guns. Several years later, they changed the strangulation into an Invector Standard for 12-gauge guns. To my knowledge, this design has not been used in 20-gauge guns.

Ithaca's current manufacturing use a choke with the typical exterior dimensions of Invector Plus but is based on a dia .730 as cylinder.

Ithaca 12 cal. Oldest style, 44 TPI:

Exchanges with tru-choke.

Ithaca 12 cal. Intermediate production,

32 TPI: Exchanges with Invector Standard.
